

PHP Examples using Pulseem Web Service

Example 1: using Direct Send an Email

```
private function postRequestToPulseem($xml) {
    $c = curl_init();
    curl_setopt($c, CURLOPT_URL, 'http://www.pulseem.co.il/Pulseem/pulseemSendservices.asmx');
    curl_setopt($c, CURLOPT_POST, true);
    curl_setopt($c, CURLOPT_RETURNTRANSFER, 1);
    curl_setopt($c, CURLOPT_POSTFIELDS, $xml);
    curl_setopt($c, CURLOPT_HTTPHEADER, array("Content-type: text/xml; charset=UTF8"));
    $response = curl_exec($c);
    curl_close($c);
    return $response;
}

public function
sendMassMail($toEmails, $toNames, $fromName, $fromEmail, $subject, $messageHtml, $lang, $extRef) {
    $context = array('toMails'=>$toEmails,
        'toNames'=>$toNames,
        'fromName'=>$fromName,
        'fromEmail'=>$fromEmail,
        'subject'=>$subject,
        'message'=>$messageHtml,
        'lang'=>$lang,
        'pass'=>1234567,
        'extRef'=>$extRef);

    $xml = {Here your XML here}
    $result = $this->postRequestToPulseem($xml);

    return $result;
}
```

Example 2 using SOAP to ADD new client to a group:

```
function add_to_newsletter($email){
    $params = array(
        'password' => 'yourpassword',
        'intGroupID' => '4545',
        'strEmail' => "{$email}",
        'needOptin' => '0'
    );

    $wsdl_url = 'http://www.pulseem.co.il/Pulseem/pulseemservices.asmx?wsdl';

    $soap = new SoapClient($wsdl_url);

    $response = $soap->AddNewClientByEmail($params);
    if($response->AddNewClientByEmailResult == 1){
        return true;
    }
    else{
        return false;
    }
}
```

Example 3 Using SOAP for Direct Send to Send Email:

```
<?php
$context = array('userID'=> "", 'password'=> "", 'startDateTime' => '2011-08-22',
'endDateTime' => '2011-08-24');

$wsdl_url = 'http://www.pulseem.co.il/Pulseem/pulseemsendservices.asmx?wsdl';
$soap = new SoapClient($wsdl_url);
$response = $soap->GetEmailReport($context);
print_r($response);

if($response->GetEmailReport == 1){
return true;
}
else{
return false;
}

?>
```

Example 4 Using SOAP for Direct Send to Send Email:

```
$wsdl_url = 'http://www.pulseem.co.il/Pulseem/pulseemSendservices.asmx?wsdl';  
$soap = new SoapClient($wsdl_url);  
sendMassMail($toEmails,$toNames,$fromName,$fromEmail,$subject,$messageHtml,$lang,$extRef) {  
    $context = array(  
        'toEmail'=>$toEmails,  
        'toName'=>$toNames,  
        'fromEmail'=>$fromEmail,  
        'fromName'=>$fromName,  
        'subject'=>$subject,  
        'HTML'=>$messageHtml,  
        'languageCode'=>$lang,  
        'userID'=>"username",//your username  
        'password'=>"1111111",//your password  
        'extRef'=>$extRef  
    );  
    $result= $soap->SendEmail($context);  
    return $result;  
}
```
